

elmex Distribution Blocks are an Innovative Engineering Solution to satisfy customers' needs. They find application in Power Distribution for Control Circuits and can also be used to centralise earthing for the entire Panel. These Blocks are completely shrouded and accommodate single input and multiple outputs. They replace conventional open Bus Bars, ensuring perfect continuity.

Two varieties of Distribution Blocks are available - one is suitable for identical size of conductors as input/output, and another for higher conductor size as input and lower as output.

FDBK extends the same advantages and features of DBK Distribution Blocks. These blocks are suitable for Control applications.

DESCRIPTION	DBK 8*	DBK 1x2	DBK 1x4
TERMINAL PITCH	82 mm (3.23 inch)	53 mm (2.09 inch)	73 mm (2.87 inch)
